What is a Megatron 1500V 373kwh Battery Cabinet?

MEGATRON 1500V 373kWh liquid-cooled energy storage battery cabinets are an integrated high energy density, long lasting, battery energy storage system. Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system.

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Can a 373kwh rack system be paired with a 1500V PCs inverter?

373kWh rack systems can be paired with 1500V PCS inverters to complete fully functioning battery energy storage systems. The battery pack, string and cabinets are certified by TUV to align with IEC/UL standards of UL 9540A, UL 1973, IEC 62619 etc.

How many ups do I need to run a data centre?

In a data centre system if you require 10 UPS units for normal operation, in a N+1 system you would have your 10 UPS plus 1 additional unit to reduce chance of downtime. In order to run the same 10 unit data centre in a 2N system you would need 20 UPS units 10 for normal operation and 10 more for backup.

Nexpand Cabinet Nexpand is a premium configure-to-order server cabinet platform that helps improve energy efficiency in the data center. It offers a highly configurable design with infinitely adjustable accessories, ...
