There are over 5 million solar installations in the United States, delivering clean, affordable, reliable energy to American communities.

Our team delivers full-service solar energy solutions, from design to installation and maintenance. Whether you're operating one facility or planning a multi-site rollout, we'll customize a ...

According to Renewables Now, the three new solar farms combined have 1.3 million solar panels manufactured in America by First Solar.

The agreement has enabled the construction of a roughly 650-acre, 60-megawatt solar farm on farmland in North Carolina. Called Summit Farms, the facility is the largest renewable-energy project ever built ...

It involves the deployment of solar panels or photovoltaic (PV) modules on rooftops, parking lots, or other available spaces on the property. On-site solar installations can vary in size, from small ...

Each quarter, NREL conducts a presentation of technical trends within the solar industry.

Although several options are available for on-site renewable generation, and the best solution can vary from one location to another, this resource focuses on solar photovoltaic (PV) systems as a specific ...

In 2024, CAISO curtailed 3.4 million megawatthours (MWh) of utility-scale wind and solar output, a 29% increase from the amount of electricity curtailed in 2023. Solar accounted for 93% of ...

Onsite solar is an asset located where the renewable energy generated will also be consumed. There are three main types of onsite solar: rooftop, ground-mount, and carport.

Onsite renewables are supplying more than six times more of the site energy for properties benchmarking in Portfolio Manager as compared to a decade ago. We see the highest proportional ...
