Why do data centers need seismic rack cabinets?

In earthquake-prone regions, countries and areas require seismic-resistant solutions to safeguard data centers and critical infrastructure. Seismic rack cabinets provide an ideal solution for protecting essential equipment in data centers during seismic events.

What is a seismic server rack?

Seismic Electronics Packaging Racks certified to GR-63-CORE AMCO Enclosures' seismic server racks are essential for facilities located in earthquake zones. When severe tremors occur, they can pose a significant threat to your operation's servers.

What is a seismic rack cabinet?

Earthquake Resistance: Seismic rack cabinets are engineered to safeguard equipment during and after an earthquake. Canovate's seismic cabinets meet international standards and have passed rigorous earthquake resistance tests, ensuring data center equipment remains secure and infrastructure stability is maintained.

Does Amco enclosures offer seismic racking products?

AMCO Enclosures even offers our seismic racking products in multiple colors. Your business can choose a hue that allows these racks to blend in well with your space or reflect your company's colors. Plus, our products are made in the USA, allowing you to support the local economy and jobs.

Tactical Operations Center Deployment A U.S. Army Tactical Operations Center implemented ruggedized server racks to support command and control functions in field conditions ...

No cost program for data center and IT professionals who purchase multiple server racks + cabinets each year. Free design consultations, dedicated customer service representative, pre-installed ...

Seismic server racks protect servers by transforming potential disaster scenarios into manageable events. These specialized enclosures employ multiple protection mechanisms that work ...

Our seismic racks meet strict industry standards, offering robust construction and enhanced stability to safeguard IT, server, and network hardware. Choose from a range of sizes and configurations, ...

5MW of server racks for disaster relief in North America

These nVent solutions provide fastening, cable management, protection and connection solutions for data centers facing issues including:

To protect data centers from property damage and business interruption, take a holistic, multi-layered and analytical approach to natural catastrophe and climate risks.

American Tech Supply is a data cabinet distributor and carries a complete line of data cabinets, data enclosures, open bay racks, relay racks, LAN racks, enclosures, fiber optic ...

Platinum 2.0 Server | Zone 4 Seismic Enclosures Zone 4 Seismic rated, our fully-welded 4-post frame data center racks can carry a 3,000 lb static or dynamic load. They are powder coated to prevent ...

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and reliable ...

Seismic ZN4 EP Seismic Electronics Packaging Racks certified to GR-63-CORE AMCO Enclosures" seismic server racks are essential for facilities located in earthquake zones. When severe tremors ...
