What are solar home appliances?

Solar home appliances are a whole new micro-universe, similar but at the same time completely different from those big solar panels you see on rooftops. From your kitchen to your living room, and even your bathroom, solar-powered appliances are ready to revolutionize our lives. And I'm about to show you how!

Are solar home appliances a micro-universe?

But when I switched it on, there was this warm, bright light that filled the room, and I knew I was onto something. Solar home appliances are a whole new micro-universe, similar but at the same time completely different from those big solar panels you see on rooftops.

Are solar appliances eco-friendly?

As with all other types of solar appliances, they are eco-friendly. But it's their big initial investment that damages their impressive sustainability reputation. Plus, solar refrigerators, freezers, and dishwashers all run on current electrical wiring, so there's NO solar panel independence like with small garden lights.
