Will the global solar inverter market fall in 2026?

Wood Mackenzie's latest analysis expects market uncertainty in China, Europe and the U.S. to cause two consecutive years of contraction in the global solar inverter market, forecasting a fall to 577 GWac this year and 523 GWac in 2026. Image: Lauri Veerde, Wikimedia Commons, CC BY-SA 4.0

Will the global solar inverter market contract in 2025?

The global solar inverter market is set to contract over the next two years, according to analysis from Wood Mackenzie. The consultancy is forecasting the market will fall to 577 GWac in 2025, a 2% year-on-year decrease, followed by a further 9% drop to 523 GWac in 2026.

Will China's solar inverter market decline 5% in 2025?

China's solar inverter market is set to decline 5% in 2025 to 304 GWac, representing the first annual decline in 2019. Nevertheless, the country is still expected to maintain its dominance in the global market, accounting for over 2.9 TWac of cumulative inverter demand through to 2034, according to Wood Mackenzie's forecasts.

Will the solar inverter market recover?

By the early 2030s, Wood Mackenzie is projecting the solar inverter market to recover and surpass the 2024 market size with electrification, AI demand growth and a cyclical repowering market set to provide a solid foundation for inverter demand.

The drop in solar energy costs over the past five decades has been dramatic, from over \$100 per watt in the 1970s to under \$0.25 per watt today. However, while headlines have often ...

The global solar inverter market will contract for two consecutive years, declining 2% to 577 Gigawatts AC (GWac) in 2025 and a further 9% to 523 GWac in 2026, according to Wood ...

Over the past decade, the cost of solar panels has decreased globally by 90%, now being under \$0.20 (£0.15) per watt. Conversion efficiency improved from 1-2% to 22% within the past ...

Despite the prevailing global trend of inflation, there is an anomaly worth noting: the declining prices of solar modules. According to PV Europe Magazine, these prices have plummeted by a remarkable ...

Analysis of the reasons for the price drop of solar inverters

Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many ...

Wood Mackenzie's latest analysis expects market uncertainty in China, Europe and the U.S. to cause two consecutive years of contraction in the global solar inverter market, forecasting a ...

The global solar inverter market is set to contract over the next two years, according to analysis from Wood Mackenzie. The consultancy is forecasting the market will fall to 577 GWac in ...

Inside Clean Energy Solar Panel Prices Are Low Again. Here's Who's Winning and Losing Whether for utility-scale or rooftop projects, photovoltaic panels are cheaper than ever.

PV Module and System Price Declines and Where Things Go From Here Michael Woodhouse, Jacob Cordell, Vignesh Ramasamy, Jarett Zuboy, Brittany Smith, Robert Margolis, and ...

Analysis of the reasons for the price reduction of photovoltaic panels What factors influence cost reductions in solar photovoltaics? Beyond the learning curve: factors influencing cost ...
