Can Bolivia tap the world's biggest lithium deposits?

Salar de Uyuni. Stock image. Bolivia is stepping up efforts to tap the world's biggest lithium deposits, readying deals with new investors to build processing plants despite low prices and growing opposition from lawmakers and citizen groups.

How much does lithium cost in Bolivia?

Although the contracts estimate a lithium price of \$30,000 per ton, Alarcon noted that a price of at least \$10,000 -- more or less where prices are now -- is necessary to ensure the plants' commercial viability. But Bolivia's track record of lithium development is far from stellar.

Will Bolivia control YLB lithium plants?

Alarcon dismissed those criticisms as politically motivated or misinformed. Bolivia will control the lithium sales and hold a majority stake in the ventures, he said, adding that YLB won't begin to repay the investments until plants are running at full tilt, ensuring minimal financial risk for the state.

Does Bolivia contribute to global supply?

For now, Bolivia's contribution to global supply is negligible. While the landlocked country has much more resources than neighboring Chile, they aren't yet deemed economically viable.

The energy storage capacitor bank is commonly used in different fields like power electronics, battery enhancements, memory protection, power quality improvement, portable energy ...
