How will the UK deliver clean power by 2030?

5.1 The Government made a manifesto commitment to deliver clean power by 2030, and the UK has legally binding net zero and carbon budget targets. These will require the accelerated delivery of several low-carbon technologies, including renewables such as onshore wind and solar.

How will RenewableUK support the onshore wind sector?

The Government supports the work of RenewableUK to expand the Energy Skills Passport to the onshore wind sector via the development of new career pathways. The Government wants to ensure the benefits of clean energy, including onshore wind deployment, are captured and felt across the whole of the UK.

What is the UK's onshore wind strategy?

Drawing on the Taskforce's work, this Strategy includes 42 actions, primarily Government commitments, to resolve the key blockers to onshore wind in the UK. The key actions include: 1.

How many jobs will the onshore wind sector support in Great Britain?

The onshore wind sector could support up to 45,000 direct and indirect jobs in Great Britain by 2030. The 2030 estimate is based on a scenario where up to 29GW of installed onshore wind capacity is achieved by 2030, in line with the top of the Clean Power Action Plan range for onshore wind.

In July 2025, the Department for Energy Security and Net Zero ("DESNZ") published its first-ever dedicated strategy aimed at revitalising the deployment of onshore wind power in the UK (the " ...

To fully deliver, the new Government will need a massive overhaul of the UK's approach to planning and deployment, both of wind farms and the relevant grid infrastructure. They've made a ...

It sets out more than 40 steps government and industry will take to help deliver up to 29GW of onshore wind by 2030. That includes driving ambitious reforms to planning, grid connections, and...

5.1 The Government made a manifesto commitment to deliver clean power by 2030, and the UK has legally

British solar-powered communication cabinet wind power government document

binding net zero and carbon budget targets. These will require the accelerated ...

The UK Government will convene a new Solar Council, chaired jointly by government and industry, and attended by solar industry representatives, government departments, devolved...

Labour's manifesto made bold promises on energy and climate, including the core mission of delivering "clean power" by 2030. This includes a commitment to double onshore wind, ...

Britain has taken another significant leap towards energy independence and lower bills as it announces record levels of new solar and onshore wind projects as part of its latest renewables...

EK-SG-D03 outdoor wind power communication energy cabinet is a device that stores renewable energy such as solar energy and wind energy and outputs electrical energy.

The Government has set a target to double onshore wind, treble solar and quadruple offshore wind by 2030. This will result in a wholesale shift in our long-term power system.
