There was dire need for a high-quality hydrophobic, self-clean, high-performance nano solar panel coating, long-lasting, easy-to-clean protective coating on all forms of solar photovoltaic panels that ...

The optical transparency of self-cleaning or anti-soiling coating is of paramount importance in the case of solar photovoltaic panels and related solar devices.

Through extensive research and development, Element 119 offers a specifically designed coating for solar panels. Our new solar panel coating is invisible and lasts for many years. Element 119 is the ...

Recent scientific research has shown that the application of nanotechnology can increase the efficiency of the traditional glass cover of FPSC. Antireflective and self-cleaning nanocoating has...

Coating process has developed a novel anti-fingerprint nano-coating. The anti-fingerprint effect means that fingerprints on the surface cannot be seen at all by the naked eye, or only very slightly. Although ...

Nano coating, also known as nanocoating or nanotechnology coating, involves applying a liquid polymer containing nanoparticles to the surface of solar panels. These nanoparticles are typically composed ...

You are very likely reading this as you too have a challenge that can be solved by coating your surface to have anti-fingerprint qualities. We will work directly with you on a customized anti fingerprint ...

We offer a transparent fluoropolymer coating that resists water and oil without altering the appearance of substrates such as glass by generating a thin monolayer on the surface, which reduces fingerprints ...

A water-based coating for solar panels that minimizes reflections while maintaining dirt and dust repellency. The coating, comprising a silicon dioxide-based liquid, is applied to the solar ...

Can photovoltaic panels be coated with anti-fingerprint liquid

I was told that they have an Anti-Reflective Coatings (ARC) on the panels and thus should not be handled without gloves. Well the workmen from the solar installation company (a Sunpower ...
