---

China unveils the Rudong EVx gravity battery in partnership with Switzerland's Energy Vault--an innovative leap in renewable energy storage that could transform global energy systems ...

Abstract This paper presents a techno-economic optimization model to analyze the economic viability of a photovoltaic battery (PVB) system for different residential customer groups in ...

Chinese researchers have built a solar redox flow battery (SRFB) that can harvest sunlight and store energy at the same time, while reaching a solar-to-electricity conversion efficiency...

For wind and solar power plants to reach their full potential, they need storage systems. A Swiss start-up is introducing a gravity-based battery solution. It is an extraordinary energy storage ...

A gravity battery developed in Switzerland stores renewable energy in heavy blocks of material - an idea that is attracting interest around the world, especially in China.

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

In der Schweiz deckt Solarenergie im Jahr 2025 bereits rund 14 Prozent unseres Strombedarfs. Doch wohin mit dem &#220;berschuss, wenn kurzzeitig mehr Strom erzeugt als ben&#246;tigt wird? Hier kommen ...

From 2018 through 2022, solar parts were the dominant export earner among China's clean energy suite, but since then a drop-off in solar sales as key markets hit saturation point has ...

The technology, called planar optical micro-tracking, allows to concentrate sunlight on tiny solar cells, without any tilt. This makes the use of high efficiency space-grade solar cells ...
