Do HOAs have to approve solar panels?

Solar panels must be installed by a licensed professional. All solar panel systems must be approved by the HOA prior to installation. Keep in mind that HOAs in states without solar access laws may have more regulatory power to prevent solar installations based on aesthetic preferences.

Are solar access laws limiting the power of Hoa committees?

Many states have passed solar access laws that limit the power of HOA committees when it comes to placing unreasonable restrictions on solar panels.

How do HOAs regulate solar panels?

Each state has its own set of laws regarding solar access, which can influence how HOAs govern solar panel installations. For instance, some states have "solar easement provisions" that limit the ability of HOAs to restrict solar installations outright. Federal laws also play a role, particularly through policies that encourage renewable energy.

Can a Hoa restrict a solar installation?

For instance, some states have "solar easement provisions" that limit the ability of HOAs to restrict solar installations outright. Federal laws also play a role, particularly through policies that encourage renewable energy. These laws are designed to protect your right to install solar panels, even if you live in an HOA community.
