Cuba launches new solar parks aiming for 2,000 MW by 2028, tackling energy crisis with Chinese-backed tech and renewable energy investments.

The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel.

By 2025, 200 MW of battery systems will be installed to store solar energy, key to stabilizing the grid. Containers are already in Cuba, awaiting assembly.

Now, it will host five of the solar parks to be built on the island. The region has an industrial port, a thermal power plant, and a refinery, making it a key area for the country's energy ...

Cuba is investing in solar energy and battery storage to address its severe energy crisis, reduce dependency on fossil fuels, and improve the reliability and stability of its power supply.

The Road Ahead for Cuba solar energy While the Cuban government has not set a specific deadline for achieving full energy independence, the accelerated push for solar in 2026 marks a ...

Cuba Accelerates Solar Power Expansion to Counter U.S. Fossil Fuel Restrictions February 5, 2026 at 4:12 PM GMT+0 V By Vlad Chernikov, Chief editor

The Cuban government assured this Wednesday that it will soon rank among the top three countries in the world in making the fastest progress towards the use of clean energy, amid the ...

Cuba aims for solar energy growth, but lacks essential battery storage. Explore the challenges and solutions. Act now for change!

Discover how the Santiago de Cuba solar photovoltaic plant is transforming renewable energy adoption in the
