This study investigates the issues and challenges surrounding energy storage project and portfolio valuation and provide insights into improving visibility into the process for developers, capital ...

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are ...

Using the Web of Science (WoS) and Scopus databases, a scientometric analysis was carried out to understand the methods that have been used in the financial appraisal of photovoltaic ...

Searchable directory contains 100s of resources to understand the issues throughout the renewable energy project development process.

For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify the economic and grid impacts of distributed and ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment.

In the chart below, reported historical utility-scale PV plant CAPEX (Bolinger et al., 2023) is shown in box-and-whiskers format for comparison to the historical benchmarked and future CAPEX ...

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

mp, Cody Warner, Anjali Katta, and Dana Robson Berkeley Lab's annual Utility-Scale Solar report presents trends in deployment, technology, capital expenditures (CapEx), operating expenses ...

Development scale of photovoltaic and energy storage projects
