The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase ...

BESS operating software may be a target for cyberattacks which could, in turn, heighten property or liability risks for homeowners. Residential battery energy storage systems (BESS) can serve two ...

Some clean energy come-ons are a ruse to get your personal identifying information. In June, Huntsville Utilities in Alabama warned residents about callers posing as utility representatives offering cheap ...

Here's the juice - while specific projects might crash harder than a crypto bro's portfolio (looking at you, Zhejiang's 2024 commercial storage collapse) [6], the energy storage sector itself is as real as the ...

FILING A COMPLAINT ABOUT A CONSUMER SCAM If you have experienced a scam, federal and state agencies can help.

There have been numerous reports of scammers using Elon Musk's name to promote fake energy-saving devices. These scams often claim that the device can drastically reduce energy bills, but...

We found that PBS Region 9 failed to ensure that the battery systems were properly maintained by the ESCO, resulting in a battery explosion, hazardous materials leaks, an injury, and a fire.

Falling victim to an energy storage scam can be a distressing experience, but it is crucial to know the available avenues for recourse. The first step involves gathering evidence of the fraudulent activity, ...

However, because energy storage technologies are generally newer than most other types of grid infrastructure like substations and transformers, there are questions and claims related to the safety of a common battery ...

Energy storage system fraud

Well, you know what they say - where there's a green energy boom, there's someone trying to make a quick buck. In Q1 2024 alone, Chinese regulators investigated 47 energy storage projects involving ...
