-----

The modern grid must enable more choice and convenience for consumers. The modern grid must do all this while achieving higher standards of performance in reliability, efficiency, security, cost of service, ...

DOE National Laboratories are participating across GMI's technology areas in a coordinated strategic partnership called the Grid Modernization Lab Consortium (GMLC).

This document summarizes an overarching grid modernization strategy, which serves as the foundation for future investments and coordination for grid modernization RDD& D at DOE.

The interdependency and interaction across transmission, distribution and communication systems can no longer be ignored, demanding integrated analysis of the end-to-end power grid.

Meet NLR's grid modernization experts and explore their research shaping the future of the power grid. Check out the On the Road to Increased Transmission series to learn how the United ...

This rural electrification project will eventually supply seven (7) villages located in the Ngouni? province: Kanda, Moukoundou, Mandji, Dibwangui, Bilala, Ndoubi, Makongonio, and connect over 2000 ...

Discover grid modernization trends, digital technologies, and renewable integration. Learn how infrastructure upgrades create a more resilient power grid.

We are working with public and private partners to develop the concepts, tools, and technologies needed to measure, analyze, predict, protect, and control the grid of the future.

Our modernization programs aim to increase grid resilience at the transmission and distribution levels; enable grid integration of distributed energy resources and new grid-related technologies; and ...
