-----  
How much does a solar installation cost in France?

Shadows can significantly reduce the energy output of your solar panels. The price of a solar installation depends on several factors such as power (expressed in kilowatt-peak, or kWp), the technology chosen and installation costs. On average in France, count between 2500 and 4000 euros excluding tax per kWp for a residential installation.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.

How much electricity can a solar panel save?

The amount saved does of course depend on how much you are paying for electricity now, and how much sunshine your solar panels are able to use. This depends significantly on location; for example, in one year, an average solar panel will produce more electricity in Marseille (620 kWh) than in Paris (430 kWh).

Panneaux solaires &#224; Paris : 1 210h de soleil/an, rentables en 10 ans. D&#233;couvrez prix, aides 2026 et simulez gratuitement votre installation.
