What is an air conditioner bracket?

An air conditioner bracket, also known as an air conditioner support bracket or outdoor unit bracket, is a metal frame designed to mount and support the weight of an air conditioner's outdoor unit securely.

Do air conditioners need brackets?

**Safety and Security:** Modern air conditioning units often require drilling brackets into the walls for secure installation. With the exception of central, ceiling, and portable AC systems, most air conditioners need brackets to safely hold the weight of the unit and prevent it from falling, which could cause damage or injury.

How do I choose the right air conditioner bracket?

Measure the width and height of the bracket and compare it to the dimensions of your air conditioner. The bracket should be slightly larger than the air conditioner to ensure a secure fit. The type of installation: There are two main types of air conditioner installations - window and wall.
