Will India achieve 100 GW of solar power by 2025?

India's commitment to clean energy is evident in its target of achieving 500 GW of non-fossil fuel-based capacity by 2030, with solar power expected to contribute a substantial portion, aiming for 280 GW of solar PV capacity by that year. As of January 31, 2025, India has reached a significant milestone of 100 gigawatts in solar installed capacity.

How much solar power does India have?

India's cumulative solar power capacity stood at 119.02 GW as of July 2025. This includes 90.99 GW from ground-mounted solar plants, 19.88 GW from grid-connected rooftop systems, 3.06 GW from hybrid projects, and 5.09 GW from off-grid solar installations, reflecting the country's diverse approach to expanding renewable energy.

Is India ready for a solar energy revolution?

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in FY2025, driven by government initiatives like the PLI scheme, rooftop solar programmes and solar parks.

How much solar capacity did India add in Q2 2025?

India added 11.3 GW of solar capacity in Q2 2025 compared to around 6.8 GW in Q1 2025, marking a 66.9% quarter-over-quarter increase. The surge was largely driven by policy-linked commissioning deadlines and the boost in rooftop solar installations.

India is in the middle of a major shift in how it generates electricity as solar installations continue to rise at a pace that has surprised even power sector planners. Large-scale projects, policy ...

This study reviews the current state of solar power generation in India. The review also focuses on the challenges and opportunities for solar energy in In

India aims to install 500 GW of renewable energy by 2030, with solar expected to account for nearly 300 GW.

Solar energy in India is rapidly increasing, supported by favourable government policies in pursuit of their 2030 renewable energy goals.

India 2000W solar energy

India added 11.3 GW of solar capacity in Q2 2025 compared to around 6.8 GW in Q1 2025, marking a 66.9% quarter-over-quarter increase.

Chapter 11-Solar Energy in India, Achievements, The Potential of Solar Energy, and Their Importance. Role of applied sciences in social implications volume B: Earth, environment & energy.

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

In July 2025, India's solar power capacity had increased by 4,000%, and the country's total renewable energy capacity reached 227 GW. Palli village in Jammu & Kashmir became a ...

Solar energy in India - statistics & facts India's solar energy market is experiencing significant and rapid growth, establishing itself as a global leader in solar power deployment.
