-----

As the country pursues the ambitious goal of 100% carbon-free electricity by 2035, renewable energy and batteries are the top priorities, not nuclear power. This is because of greater ...

67% of U.S. adults prioritize the development of alternative energy sources such as wind, solar and hydrogen power over increasing the production of fossil fuel energy sources.

"Our analysis shows the U.S. grid is entering a transformative period, with solar installations surging in the near term and nuclear power taking a leading role in the decades ahead.

Solar and wind energy will lead the growth in U.S. power generation for at least the next two years, according to EIA estimates. This report uses data from the EIA to analyze solar and wind...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Solar photovoltaic (PV) systems will play a crucial role in meeting the United States' climate and energy goals. Their affordability, ease of installation, and versatility have made them the fastest ...

To lay the foundation for a strong energy economy, the solar industry proposes an agenda organized around the following top 10 priorities. #1: American energy dominance. The U.S. is #2 in solar power ...

The year 2024 was a true landmark year for solar power. Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another ...

Despite the Trump administration's wide-ranging attacks on ...

While solar and wind power are set to take a hit, the case for renewable energy remains strong. A memo from NRDC reviewed five elements of U.S. renewable energy strength.

## Is solar power generation a priority

Despite the Trump administration's wide-ranging attacks on renewables like wind and solar power, the clean-energy industry is on pace for record growth this year, according to ...
