Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

How does the WTO anti-dumping Agreement work?

Under the WTO Anti-Dumping Agreement, Members may apply temporary measures to counteract dumped imports which result in injury to their domestic industries producing like products. Before any measure is applied, the relevant importing Member must conduct an investigation.

How does dumping affect SACU?

Dumping leads to local prices for similar goods manufactured in SACU being undermined, making it difficult for these local producers to compete. This ultimately harms manufacturers and jeopardises their market position in the region.

5. What is a subsidised export?

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.
