In essence, Kosovo's venture into wind energy signifies more than just an expansion of its renewable energy capacity. It represents a critical step towards a more resilient and economically ...

As Kosovo accelerates its renewable energy transition, the New Energy Storage Demonstration Project addresses a critical challenge: balancing intermittent solar/wind power with reliable electricity supply.

You know, Kosovo's facing a sort of perfect storm in energy. With coal dependency at 95% and EU integration talks accelerating, the 2025 Energy Storage Conference couldn't come at a better time.

To fulfil the National Strategy, it is envisaged that at least 1,400 MW of energy will be generated from wind and solar power by 2031. Kosovo still generates electricity primarily from coal ...

Prime Minister Albin Kurti and Minister of Economy Artane Rizvanolli meeting RES developers Kosovo Solar Forum Kosovo's recent Energy Strategy sets an ambitious vision to ...

Explore the 22% surge in Kosovo's solar and wind energy projects. Learn how international collaboration, particularly from Germany, is driving this sustainable transformation.

A comparison between Kosovo energy system operating states S 5 and S 7 with a 70 % share of heat pumps for individual heating in a coal-based energy system with 100 % flexible TPPs shows that the ...

The objective of the Battery Energy Storage System (BESS) project is to support Kosovo's energy security and transition to a cleaner energy future through usage of energy storage systems for ...

With abundant wind resources and increasing solar potential, the country is turning to hybrid energy storage systems to stabilize its grid and reduce reliance on fossil fuels.
