---

Lithium has re-emerged as a strategically important commodity as prices show renewed upward movement following a prolonged downturn. The metal remains indispensable for lithium-ion ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

High peak hour power prices in China have emerged as the driving force behind a revival in the price of lithium, a key battery metal, which has risen by 25% over the past four weeks, and...

For energy storage buyers, this isn't just a headline; it's a warning: projects delayed today could cost 15-20% more by 2026. Yet amid this cost pressure, some "bargains" should terrify you.

Discover how lithium prices in China's energy storage markets are driving recovery to 80,000 CNY/tonne amid booming demand.

The global lithium market is undergoing a pivotal transformation, shifting from electric vehicle (EV)-driven demand to a new era dominated by grid-scale energy storage.

Chinese lithium prices are getting a boost from growing confidence in demand for large-scale battery storage.

J.P. Morgan's recent analysis shows that shipments of stationary energy storage batteries will rise by 50% in 2025 and 43% in 2026. This surge is causing the lithium supply to move ...

China's energy storage firms, battered by a three-year price war, have been jolted by lithium battery maker Deegares, which has announced plans to raise prices by 15 per cent, a move...

Section 301 tariffs and the Inflation Reduction Act's 45X tax credit could make U.S.-made lithium-ion battery
