Which solar lights are eco-friendly?

No. 3: Philips |LED Solar Streetlight No. 4: Mitsushi |Solar Lamps No. 5: ICON |Solar Light | 1800W The descriptions of each product are referenced from content available on manufacturer, brand, and e-commerce sites. Shifting to eco-friendly alternatives in place of everyday items is an easy and simple way to practice a more sustainable lifestyle.

Where can I buy solar lights?

You can also purchase them online on Lazada,Shopee,and other leading e-commerce platforms. Using solar lights is an eco-friendly and more economical way of illuminating your home because it utilizes sunlight as a source of energy. If you want to save more on your electric costs,here are other appliances that you can check out:

Can solar lights be used indoors?

While solar lights are mostly meant for outdoor use,these can also be placed and charged indoors,especially the smaller ones like wall lights or step lights. Just make sure to put them somewhere where they can get enough sunlight --it doesn't necessarily have to be direct.

How long do solar lights last?

They also last longer than lead acid batteries,with a lifespan of up to five to six yearsand a capacity of up to 6000mAh. These batteries perform well and recharge fast even in lower temperatures,making it advantageous to use for outdoor solar lights.
