Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

Can a battery cabinet be connected in parallel?

New and old battery cabinets can be connected in parallel. Easy maintenance: Batteries can be swapped for maintenance due to the modular design. High cycle performance of cells: 25°C, 0.5C charging/1C discharging, 50% depth of discharge (DOD), 5000 cycles at 70% end of life (EOL).

Where can I find the instruction manual for the batteries?

Inside the door there is a document pocket containing the instruction manual for the batteries. The sections can be fixed together to form a single cabinet. Where required, the cabinet is completed by a special compartment or switch/disconnector cubicle containing the protection equipment.

How many lithium battery cabinets can be connected in parallel?

A maximum of 15 SmartLi 2.0 lithium battery cabinets can be connected in parallel. When multiple cabinets are connected in parallel, only the master cabinet has an LCD. Easy capacity expansion: Batteries can be added along with load increase by stages. New and old battery cabinets can be connected in parallel.

The purpose of this manual is to provide the skilled technician (see paragraph 2.2.1) with instructions for safely installing the modular battery cabinet Keor MOD, also called "equipment" in the ...

The product must be installed according to the specifications and requirements as defined by Schneider Electric. It concerns in particular the external and internal protections ...
