Should Myanmar invest in solar energy?

Myanmar junta industry minister Charlie Than has stressed the need to attract local and foreign investments in solar energy, as regime leaders ramp up promotion of solar amid a nationwide electricity shortage.

Is solar power a solution to Myanmar's power crisis?

He also inspected a solar panel factory in Hline Township, urging an increase in production to meet rising market demand. Electricity shortages have plagued Myanmar since soon after the military seized power in 2021. Junta boss Min Aung Hlaing has been fixated on solar power as a potential solution since last year, as power outages worsened.

Will China invest in Myanmar's electricity sector?

During recent trips to China and Russia, Min Aung Hlaing touted for foreign investment in Myanmar's electricity sector. Chinese companies are already building solar power plants in the country. The regime has also announced plans to establish solar power plants with Chinese support.

How many hours a day does Myanmar have a power supply?

After a brief period of 12 to 16 hours of electricity per day, the regime reintroduced the old power supply schedule in Myanmar's commercial capital of Yangon on Monday. The reintroduction has left residents with only four hours of power followed by an eight-hour blackout, meaning they must endure 16 hours a day without electricity. Your Thoughts ...
