What does EV mean in a policy?

Ambitions: government goals or objectives (also known as unofficial targets) as set out in a policy document such as a deployment roadmap or strategy. Acronyms used in the table: EVs = electric vehicles, which include battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs). HEVs = hybrid electric vehicles.

What is the interrelatedness of policy governing the electric vehicles market?

We particularly stress the interrelatedness of policies governing the demand structure of the electric vehicles market and its main complementary sector, the charging infrastructure, which need to be aligned in the progressively more complex segments making up the electric vehicles market.

What are EV support policies?

3.2. Political theories regarding national characteristics In the early stage of technology diffusion, effective support policies are important. Introducing EV support policies is a political decision by a jurisdiction, such as a nation or federal state, or a city.

What are new energy vehicles (NEVs)?

One of these is the electric vehicles industry, which includes different types of vehicles such as public buses, logistics vehicles and private passenger cars. In China, these became known as New Energy Vehicles (NEVs), as they are powered by different new energy technologies (pure battery electric, plug-in hybrid electric and fuel cell vehicles).
