OverviewStructurePerformanceSynthesisHistoryPropertiesUsageLithium nickel manganese cobalt oxides (abbreviated as Li-NMC, LNMC, NMC, or NCM) are mixed metal oxides of lithium, nickel, manganese and cobalt with the general formula $\text{LiNi}_x\text{Mn}_y\text{Co}_{1-x-y}\text{O}_2$. These materials are commonly used in lithium-ion batteries for mobile devices and electric vehicles, acting as the positively charged electrode, commonly called the cathode (though when charging it is actually the anode). ...
