We specialize in advanced photovoltaic energy storage solutions, providing high-efficiency battery cabinets designed for reliable, sustainable, and clean energy.

The 2.6 MW BESS projects are just the start of battery storage in the country with YESS Power, a Turkey-based contractor, planning to commission a ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs ...

This facility is the first of its kind at this scale in the region. By pairing a solar power plant with a large-scale battery, the system can store excess energy generated during peak sunlight hours ...

Discover how North Macedonia is leveraging lithium battery technology to transform energy storage systems and support renewable energy integration. This article explores applications, market trends, ...

North Macedonia currently has more than 1,200 MW of photovoltaic capacity in operation and, according to annual investment plans and the new Energy Law, an additional 3,000-4,000 MW are expected.

Spanning 57 hectares, the plant generates about 85 GWh of clean electricity annually, enough to meet the energy needs of around 30,000 local homes. It is owned and operated by Skopje ...

The battery storage system is expected to enhance the plant's efficiency by storing excess solar energy and improving grid stability. It is scheduled to begin operation in the second half of 2025.

For North Macedonia to achieve its renewable targets, power lithium battery storage isn't optional - it's essential. From solar farms to industrial complexes, these systems provide the flexibility and ...
