Learn how to achieve unparalleled renewable and storage power management with the Hitachi Energy Power Plant Controller.

ePowerControl PPC is suited for the control and monitoring of utility-scale solar plant applications (grid-tied or off-grid), with advanced capabilities in the field of PV monitoring system.

The Battery Energy Storage System Power Plant Controller (BESS | PPC BESS) coordinates the storage and discharge of the battery set, aiming to achieve the plant's objectives regarding the ...

WAGO lets you choose your path to grid-compliant plant connection and operation with a certified power plant controller. Either we will support you in assembling the necessary components, or you can take ...

A power plant controller (PPC) is an automation platform designed to manage and optimize the operation of a solar farm. PPCs utilize advanced control software to efficiently operate the plant and ...

Acelerex software enables precise control of power plant operations, supporting real-time adjustments and efficiency optimization. Power Plant Controllers (PPC) are essential for managing the complex ...

The INGECON SUN Multi-Plant Controller manages the operation of a hybrid renewable energy hub by controlling the PPCs that command the inverters and converters present in those plants.

The SMA Power Plant Controller offers intelligent and flexible solutions for the park control of all PV power plants in the megawatt range. It is suitable for PV power plants with central inverters as well ...

Hardware agnostic - GEMS Power Plant Controller supports a wide range of devices from major manufacturers of renewables, energy storage, and thermal generation equipment.

Photovoltaic energy storage power station controller

Equipped with extensive control functionalities to optimize energy and financial performance, our Power Plant Controller meets the complex demands of utility-grade projects and grid interconnection ...
