What color solar panels are available?

From full black to snow white - variety of solar panel color options is where Metsolar stands out. We are an EU manufacturer of Building Integrated Photovoltaic (BIPV) solar panels for commercial and residential buildings.

How to color a solar panel?

It may require mass colored glass, i.e. flat glass with low iron content used to optimize the transmission of light, as in the case of the red, green or orange photovoltaic created by FuturaSun. Or you can use digital printing on ceramic or silk printing to color the front glass of your solar panels.

What color is a red photovoltaic?

The red photovoltaic from the Italian FuturaSun: the Silk[®]; Nova Red. The color given to the panel, a module of 370 Wp composed of 108 half cells, is in this case the glass. FuturaSun has perfected a coating technology that offers a new aesthetic to the photovoltaic integrated with buildings.

Are colorful photovoltaic panels a good idea?

Colorful photovoltaic panels are no longer a novelty. Already for years on the market circulate red, brown and even green photovoltaic modules that can camouflage their appearance and improve the integration of solar in the building. Trying to balance performance with a greater focus on aesthetics. But how valid are these solutions?

SpriColor-PV As diverse as your project The key is the SpriColor-PV glass, solar modules are adaptable individually, uniquely designed with color, motif and/or design. Play with a countless range of colors ...

Color Customization Customizable in various colors to meet diverse application scenarios Customizable Design Supports customization of various designs, with options for single or double glazing High ...

The color given to the panel, a module of 370 Wp composed of 108 half cells, is in this case the glass. FuturaSun has perfected a coating technology that offers a new aesthetic to the ...

SOLAR FACADE SOLUTION INVITIAC employs unique colored glass that conceals the busbars typically evident in traditional modules and achieves the highest power generation efficiency ...

Photovoltaic panel color glass

FuturaSun's best selling series of monocrystalline PV modules Silk™; with a touch of colour! The 108 cells modules are now also available with coloured glass and coloured frame which transform the ...

Building-integrated photovoltaics is a crucial technology for developing zero-energy buildings and sustainable cities, while great efforts are required to make photovoltaic (PV) panels ...

Kromatix's major innovation is its unique colored glass processing for photovoltaic (PV) panels. Unlike traditional coloring methods such as screen printing, painting, or the use of pigments, ...

COLORED PHOTOVOLTAIC GLASS Onyx Solar offers a wide range of color options for photovoltaic glass, from white, polar gray, and blue to earthy tones like sand, terracotta, marble ...

Metsolar can offer highest quality Colored glass solar panels PV technology enables to achieve best price and quality result.

New aesthetics of green building: Stable and long lasting Color& Texture Diversified customization
Integration of photovoltaic and architectural aesthetics Meet architectural characteristics: Compatible ...
