How much money does Portugal need to modernise its electricity grid?

Portugal: Portugal has unveiled a \$480 M(EUR400 M) investment package to modernise its electricity grid and significantly expand battery energy storage systems (BESS),following a major Iberian blackout earlier this year.

How many batteries will Portugal have in 2026?

As storage proliferates,the probability of demand curtailment events drops sharply,easing concerns for remote workers who rely on uninterrupted connectivity. If everything on the books is built,Portugal will operate roughly 750 MWof batteries by early 2026,rising toward 2 GW by 2030.

How much will Portugal invest in battery storage after Iberian blackout?

Portugal will invest \$480 M(EUR400 M) to strengthen grid stability and scale battery storage,aiming for 750 MW of BESS capacity after Iberian blackout.

What is a Casal da Cortiça battery?

On the standalone side,the Casal da Cortiça facility in Leiria,developed by Infracore Energy Storage is Portugal's first fully merchant large-scale battery using lithium technologywith a power output of 12 MVA and a charging capacity of 24 MWh. Commissioned in June 2025,it trades energy on the spot and ancillary system services.

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

Through its renewables division Enel Green Power Espa& #241;a, Endesa has put into operation at the Son Orlandis solar plant in Mallorca the largest renewable energy storage installation in Europe ...

Lisbon - December 17, 2025 - Hyperion Renewables has begun construction of its first battery energy storage system (BESS) projects in Portugal, marking a milestone for the country's grid modernization ...

These systems represent a significant milestone in the integration of solar generation and storage, bringing Portugal closer to the energy model that will define the next decade: a smart ...

Portugal vanadium battery energy storage delivered and put into operation

As a leader in renewable energy adoption--with renewables meeting 54% of its electricity needs in August and 71% from January to August--Portugal recognizes that storage is the key to ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Hyperion Renewables, a company with nearly two decades of experience in the development, financing, and operation of large-scale renewable projects, has begun construction of ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.

Looking ahead, Portugal's experience offers valuable lessons for other nations grappling with the challenges of energy transition. The importance of grid modernization, the strategic role of ...
