The solar PV inverters market is segmented by inverter type, application, and geography. By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters.

The constant economic growth in nations such as the U.S., China, and India as well as developments in supply chain and favorable government policies supporting PV inverter production in the U.S. and ...

The top 10 global solar photovoltaic (PV) inverter vendors accounted for 86% of market share in 2022, increasing by 4% year-over-year since 2021, according to latest analysis by Wood ...

The United States solar PV inverter market is growing rapidly, driven by renewable energy investments, federal incentives, and declining solar costs. According to reports, as of 2023, the U.S. solar industry ...

In 2022, Huawei had the largest PV inverter market shipments worldwide, accounting for some 29 percent of the market. Huawei was followed by Sungrow Power Supply and Ginlong Solis in ...

Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume. Sungrow and Huawei tied for first place in the list with ...

The PV inverter market was estimated at USD 48.3 billion in 2025 and is expected to grow at a CAGR of 7.2% from 2026 to 2035, driven by the rapid expansion of utility-scale and distributed solar installations.

The global PV inverters market is projected to grow from USD 18.95 billion in 2025 to USD 83.24 billion by 2034, expanding at a CAGR of 17.93%. Growth is driven by the global shift toward ...

The US PV inverter market is expected to witness significant growth, driven by expanding solar installations, increasing adoption of advanced inverter technologies, and supportive ...

Smaller inverters (≤ 0.5 kW and 0.5 - 3 kW) are generally employed for micro-generation and off-grid

Sales volume of INVT solar inverters

applications, whereas larger inverters (33 - 110 kW and > 110 kW) are mainly utilized for ...
