What is Saudi Arabia's battery storage program?

The projects mark the first phase of Saudi Arabia's ambitious battery storage program. It is designed to support its 50% renewable energy goal by 2030. Each 500 MW facility will operate for four hours, providing 2,000 MWh of total power capacity, said the SPPC.

How much will Saudi Arabia spend on energy projects in 2021?

Speaking in 2021, the Saudi government expects to spend \$293 billion on power and energy projects by then. The biggest share of this revenue is expected to be spent on transmission upgrades and renewable energy. The implementation of the world's largest battery energy system (BESS) project progresses as Saudi Arabia begins qualification tenders.

How many bidders are in Saudi Arabia's 8GWh Bess project?

The Saudi Power Procurement Company (SPPC) has released a list of 33 prequalified bidders for its 8GWh BESS project. The projects mark the first phase of Saudi Arabia's ambitious battery storage program. It is designed to support its 50% renewable energy goal by 2030.

How will Saudi Arabia achieve its 50% goal?

The implementation of the world's largest battery energy system (BESS) project progresses as Saudi Arabia begins qualification tenders. Furthermore, investment is expected to be placed in the distribution network. SPPC noted earlier this week that the newly launched BESS procurement project will help the nation reach its 50% goal.

The Saudi Ministry of Energy has formulated a battery energy storage project plan of 24 GWh from 2024 to 2025, with 2 GWh released in 2023, 6 GWh in the first half of 2024, and four projects totaling 8 ...
