Sofia 2025 Energy Storage Project Signed on July 28, 2025, in Sofia, the deal marks a major step in energy transition for Southeastern Europe, combining SUNOTEC's expertise in solar infrastructure ...

As global demand for grid stability grows, compressed air energy storage (CAES) projects like Sofia are reshaping renewable energy markets. This article explores bidding strategies, market trends, and ...

AES Bulgaria will explore options for developing a combined 100 MW solar power and battery energy storage project, as well as a standalone 80 MW battery storage project near the capital Sofia to ...

Specializing in lithium-ion and flow battery systems, this manufacturer addresses critical needs across multiple sectors from renewable energy stabilization to industrial power management.

By the end of 2025, two large photovoltaic power plants will be built in Moldova, which will increase the total capacity of renewable energy sources by 90 MW. The Ministry of Energy noted that the solar ...

IPS, headquartered in Sofia, is automating and scaling its production of battery energy storage systems (BESS). It is counting on growing demand in Europe, including the domestic market.

Located in strategic regions across Europe, these projects are rewriting the rules of energy management with enough storage capacity to power a medium-sized city during peak demand.

Sofia power station is an operating power station of at least 75-megawatts (MW) in Sofia City, Sofia, Bulgaria with multiple units, some of which are not currently operating.

With the establishment of a large number of clean energy power stations nationwide, there is an urgent need to establish long-duration energy storage stations to absorb the excess electricity ...
