When will export rebates for solar PV products be removed?

Export rebates for solar PV products will be removed entirely on 1 April 2026, and reduced for energy storage products. Image: Rinson Chory, via Unsplash.

Will China reduce the export tax rebate for solar panels?

The Chinese Ministry of Finance and the State Administration of Taxation have revealed that the country will reduce the export tax rebate for 209 products, including solar PV cells and modules from 13% to 9%, starting from December 1, 2024.

How will the end of the export tax rebate affect PV manufacturers?

The end of the export tax rebate will push up the manufacturing cost of PV manufacturers, bringing down their profits as module prices will then not be as competitive. It will curb their production expansion. As manufacturing costs go up for Chinese companies, their products will not be as cheap for overseas customers.

What is a solar panel tax rebate?

In 2023, the Minister of Finance introduced a solar panel tax rebate in the Budget Speech. It is a financial incentive for individual taxpayers who install solar panels.
