Beyond utility-scale wind and solar, phaseouts are reshaping other technologies. The residential solar 25D credit sunsets after 2025, pushing installers toward leasing, power purchase agreements ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

Our five-year national commercial solar forecast remains largely unchanged this quarter, with a 4% uplift compared to last quarter based on updated installation data.

The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027.

Solar Power Market TrendsSolar Power Market Growth FactorsRestraining FactorsSolar Power Market Segmentation AnalysisRegional InsightsList of Key Companies in Solar Power MarketReport Coverage

The research report offers a qualitative and quantitative in-depth industry analysis of the global market. It further details the adoption of solar power systems across several regions. The report provides a detailed competitive landscape by presenting information on key players and their strategies in the market. Information on trends, drivers, op...See more on fortunebusinessinsights Base Year: 2023Study Period: 2019-2032Estimated Year:

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

This report includes historical and forecasted market sizes and industry trends for Solar Electric Power Generation. It reveals overall market dynamics from 2021 through the present, and predicts industry ...

This figure is expected to grow in the upcoming years, reaching over six petawatt hours of solar production by 2030.

There is no doubt that solar power has become the driving force of the global energy transition. Looking ahead, however, there remain challenges that must be addressed for solar to ...

Solar is still growing fast, but experts disagree on how fast from 2025 to 2030. Some reports show strong growth tied to the Inflation Reduction Act and falling costs. Others expect a near-term dip ...
