The industrial sector is experiencing an increase in electricity demand, which has led to higher electricity prices. The microgrid was created as a viable solution.

For example, the PEGASUS project, funded under the Interreg MED program, was presented, which aims to implement a set of tools and measures to facilitate the development of microgrids.

It's still early days on what already feels like a long road, but the movement to create a multi-customer microgrid utility for Cuyahoga County, Ohio, moved a huge step forward earlier this ...

Microgrids can help cities and businesses increase resilience, reduce emissions, and achieve other policy goals such as brownfield redevelopment or smart city implementation.

Located about 10 km east of the Tunisian capital, Rades C will provide approximately 10% of the country's current installed capacity and become the highest efficiency plant in the country.

Since 2018, he has been with the University of Carthage, where he is Assistant Professor at the Department of Industrial Informatics. His research interests are in the area of microgrids stability, ...

Modern healthcare facilities are racing to adopt lithium-ion energy storage systems for hospital backup with IP65 ratings - and here's why your local medical center might be next in line. A surgeon's scalpel ...

Policy initiatives and incentives are being introduced to encourage the adoption of microgrids in industrial sectors, reflecting a growing commitment to sustainable energy solutions.

This paper provides a comprehensive review of microgrids and their applications in industrial settings, focusing on their benefits, challenges, and optimization techniques.

Pour répondre à ces objectifs une plateforme désignée par MICROGRID Platform

Tunis city industrial microgrids

(MGP) a été développée à l'Ecole Nationale d'Ingénieurs de Tunis. Elle regroupe des éléments de génération ...
