Uzbekistan is rapidly expanding its use of renewable sources -- particularly hydropower and wind -- as part of a broader drive to diversify its energy supply and strengthen energy security ...

Uzbekistan's solar and wind power plants generated a record 9 billion kilowatt-hours (kWh) of electricity in 2025, according to data released by the Ministry of Energy on October 22.

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power capacity target of 4 ...

The central pillars of Uzbekistan's energy policy framework can be summarised as: (1) market liberalisation and reduced fossil fuel dependency; (2) comprehensive infrastructure modernization ...

By the end of the year, Uzbekistan plans to launch 12 solar and 4 wind power plants, along with 12 energy storage systems worth over \$5 billion. 18 energy-intensive sectors of the ...

News "Green" energy generation in Uzbekistan since the beginning of the year amounted to 1 billion kWh. Since the beginning of 2026, the volume of electricity generated by solar and wind power plants ...

Uzbekistan is also promoting small-scale renewable initiatives. A new programme will install 107 megawatts of rooftop and micro-solar plants across 300 mahallas, or neighbourhoods.

Renewable energy in Uzbekistan is now a growing part of the national mix. In 2024, fourteen solar and three wind plants with a combined capacity of 4,100 MW began operating across ...

By the end of 2024, 14 solar and 3 wind power plants with a total installed capacity of 4,100 MW were commissioned in 10 regions of Uzbekistan. That year, green electricity generation ...

President Shavkat Mirziyoyev reviewed progress on major energy projects, expansion of electricity generation

Uzbekistan s new outdoor power supply

capacity, grid modernization, and nationwide energy efficiency measures aimed ...
