Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

This article explores how photovoltaic (PV) energy storage systems could transform the Vatican's energy infrastructure, reduce carbon footprints, and set an example for global sustainability.

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside ...

Solar energy is gaining traction everywhere, including at the Vatican. In an apostolic letter, Pope Francis announced that Vatican City will soon be powered by solar panels.

Completed in record time almost on the eve of the Jubilee Year, a new photovoltaic system has been installed in the Cortile delle Corazze in the entrance of the Vatican Museums and ...

The solar power plant is intended not only to power these antennas, but also "to ensure the entire energy subsistence of the Vatican City State," says the Pope.

A containerized energy storage system (often referred to as BESS container or battery storage container) is a modular unit that houses lithium-ion batteries and related ...

The "green" revolution initiated by Francis and accelerated by Leo XIV will make the Vatican the world's first zero-emissions state within a year. During a visit to Ponte Galeria three weeks ago, Leo XIV ...

This article explores how the Vatican's initiative aligns with renewable energy trends and offers insights into the growing role of energy storage in religious and historical institutions.
