Your solar panels will be sending 1 eu packets down the line so you won't be getting anything after the 8 block cable run. Put a batbox down next to your solar array so it sends 32 eu ...

Any kind of fuel can be placed in the bottom slot of the Generator GUI, and it will be burned into EU. The Generator can store up to 4,000 EU in its internal battery, ...

Honestly, the easiest way to get solar panels is just autocrafting. Making every single component by hand is absurdly time taking.

Place the Generator and connect it to a machine such as a Macerator - two machines can be placed either next to each other, or be connected with cables. Then fuel the unit.

Using only one batbox and 17 cable pieces, a single solar flower can house a whopping 49 solar panels. In fact, this array is way too much for the poor batbox to handle, it overflows very easily, ...

The interface contains a slot for slowly charging something (like a battery, jetpack, etc.), and below that a small box that glows yellow during the daytime to indicate ...

These constructions provide the benefit of compact and relatively ...
